Market Overview

Median close price rose from \$876,500 in January 2024 to \$969,000 in May 2026, but the path was uneven. Prices peaked at \$1.10 million in June 2024, fell to about \$900,000 in January 2025, and reached another high of \$1.08 million in May 2025 before moderating.

Average Days on Market fell to 23.90 days in June 2024, then lengthened through late 2025 and peaked at 35.50 days in January 2026. By May 2026 it had improved to 28.25 days.

Market Activity

New listings showed strong seasonality, ranging from 516 in December 2025 to 1,471 in May 2025. Closed sales ranged from 302 in January 2025 to 569 in August 2024.

May 2026 recorded 1,314 new listings and 537 closed sales, compared with 871 listings and 368 sales in January 2024. These endpoint gains should be interpreted alongside the pronounced monthly swings visible across the full series.

Pricing Trends

Median price per square foot moved from \$661 in January 2024 to \$700 in May 2026. Its highest observed level was \$747 in June 2025, showing meaningful seasonal and month-to-month variation rather than a smooth upward trend.

The average close-to-original-list ratio stayed near 100% for most of the period. It peaked at 101.53% in June 2024, softened to 97.62% in September 2025, and recovered to 99.33% by May 2026.

Competitive Landscape

Tracy B Do led Los Angeles listing agents with approximately \$196 million in sales volume and 152 units. Stephanie Younger ranked second with approximately \$180 million and 117 units.

After normalizing office-name capitalization, Compass led listing offices with approximately \$2.893 billion in sales volume and 2,182 units. Coldwell Banker Realty ranked second with \$921 million and 762 units.

Key Takeaways

- Median close price ended 10.6% above January 2024, but the market experienced multiple peaks and pullbacks.
- Homes generally sold very close to original asking price; seller pricing power was strongest in mid-2024 and softer in late 2025.
- Days on market and transaction activity show clear seasonal movement, so full-series context is more informative than endpoint comparisons alone.
- Compass held a substantial lead among listing offices in both sales volume and units after case-only office-name variants were consolidated.
